

OMNIA® M-Type Modules

The M-Type module is an ultra slim and compact low loss 12 fiber MTP® module. They give users flexibility to add 6 users (12 fiber) at a time versus 12 user (24 fiber module). This added modularity allows enclosures to be outfitted with multiple 12 fiber modules without affecting the total fiber density. Modules are premium low loss optical performance, with certified testing performed through the entire module to a maximum 0.55dB insertion loss (combined LC and MTP®).

OMNIA® Secure Solutions M-Type Modules

Secure solutions modules feature LC and MTP® adapters colored per network requirement.

FEATURES AND BENEFITS

- Standard Internally Shuttered LC Adapters
- Serialized and traceable
- Lightweight material
- Ultra slim design provides more room inside enclosures
- Multiple Polarity Types
- Low Loss .55dB IL per module, with custom .35dB offering available
